Looks good Paul. I didn't realize what it was at first - hence the other email I just sent. Thanks,

Subject  
Pandora Escalation

As expected, I had a similar result escalating the Pandora bond as I did with La Sal/Snowball (see the attached spreadsheet). Once again, I would like to simply inform Denison that the surety is good for the next five years.

I would like to completely review the surety as part of the proposal to combine the permits for La Sal/Snowball and Pandora.

Please let me know if you have questions or concerns about these numbers.
